S-IMS

INSTITUTE MANAGEMENT SYSTEM

Actionable -Solution For
Enhanced Performance

Signum iTechnology, a software services company is one of the major IT solution providers to the School, College, Institute, Corporate, Banking, Insurance, Government and IT sectors. Head-quartered in Mumbai, along with **MARKETING** and sales operations, the office also handles project related services in tandem with the other centers. Our goal is to serve our customers with the utmost Integrity & competence.

S-IMS Institute Management System ERP is for automation of all types of Training Institute. This application is implemented for institutes to manage Student record, Fees Structure, Receipt, Accounts of Course details, Employees records, Old student's information, Library, Stock and placement details, Mark sheet generation, ID card, Promotion by SMS & Email etc.

The main aim of this project is to give the entire details about the institute. In existing system most of the institutions work on manual method which is a time taking process and there are chances of losing data. This S-IMS will provide solution for these problems and implement best method to handle institute details.

- ID Card Report
- Certificate Report

Stock

- Stock Type Master
- Stock Entry
- Stock Report

Library

- Book Category Master
- Book Master
- Library Entry
- Library Report

Additional Features:

1. SMS Integration (API Chargeable)

Communication plays a vital role in all institutes. SMS Messaging is a fast, reliable and effective way to communicate a message with a large audience, you can be sure that your message will reach your audience within minutes if not seconds, by sending a bulk text to who you may be trying to contact, if it's the parents, students or teachers, this message will be delivered directly to their mobile phones.

- Admission Alert
- Fees Alert
- Outstanding Fees
- Class Cancellations
- Exams / Results
- Event Reminders
- Emergency Alerts
- Library Reminders
- After Institute Activities

2. Email Broadcast

Emails are delivered extremely fast when compared to traditional post. Emails can be sent 24 hours a day, 365 days a year. You can be sure that your message will reach your audience within minutes if not seconds. It will not take any charges.

3. Biometrics System

Biometrics based time and attendance terminals are becoming increasingly popular in today's market because of their many benefits (and, let's face it, hand or face scanning equipment is just pretty awesome). Because biometrics terminals read a person's unique fingerprint, iris, hand shape, or face shape, they ensure that employees cannot clock in for one another, thereby preventing employee time theft.

Noted: Need to purchase SMS package with API for use.

: Biometrics Machine has to purchase.

: Email server will be required for mail alert.
