Communication plays a vital role in all institutes. SMS Messaging is a fast, reliable and effective way to communicate a message with a large audience, you can be sure that your message will reach your audience within minutes if not seconds, by sending a bulk text to who you may be trying to contact, if it's the parents, students or teachers, this message will be delivered directly to their mobile phones.

- Admission Alert, Fees Alert
- Parent/Teacher Meetings
- Outstanding Fees / College Trips
- Event Reminders
- Exams / Results
- Emergency Alerts Etc

**Noted:** Need to purchase SMS package for use.

### E-mail Broadcast

Emails are delivered extremely fast when compared to traditional post. Emails can be sent 24 hours a day, 365 days a year. You can be sure that your message will reach your audience within minutes if not seconds. It will not take any charges.

### Biometrics System

Biometrics based time and attendance terminals are becoming increasingly popular in today's market because of their many benefits (and, let's face it, hand or face scanning equipment is just pretty awesome). Because biometrics terminals read a person's unique fingerprint, iris, hand shape, or face shape, they ensure that employees cannot clock in for one another, thereby preventing employee time theft.

### GPS Tracking with Video

A GPS tracking unit is a device, normally carried by a moving vehicle or person, that uses the Global Positioning System to determine and track its precise location, and hence that of its carrier, at intervals. This technology will help for Colleges to track their buses by route, speed, fuel control and live video inside the buses.

- CCTV Camera.
- Biometrics System.
- Speed Control.
- Fuel Control.
- RFID System.

### RFID Alert System

Radio-Frequency Identification (RFID) is the use of radio waves to read and capture information stored on a tag attached to an object. A tag can be read from up to several feet away and does not need to be within direct line-of-sight of the reader to be tracked.
