Capability Document

Signum iTechnology's Capability to provide Enterprise Services:

The framework of the model is as follows:

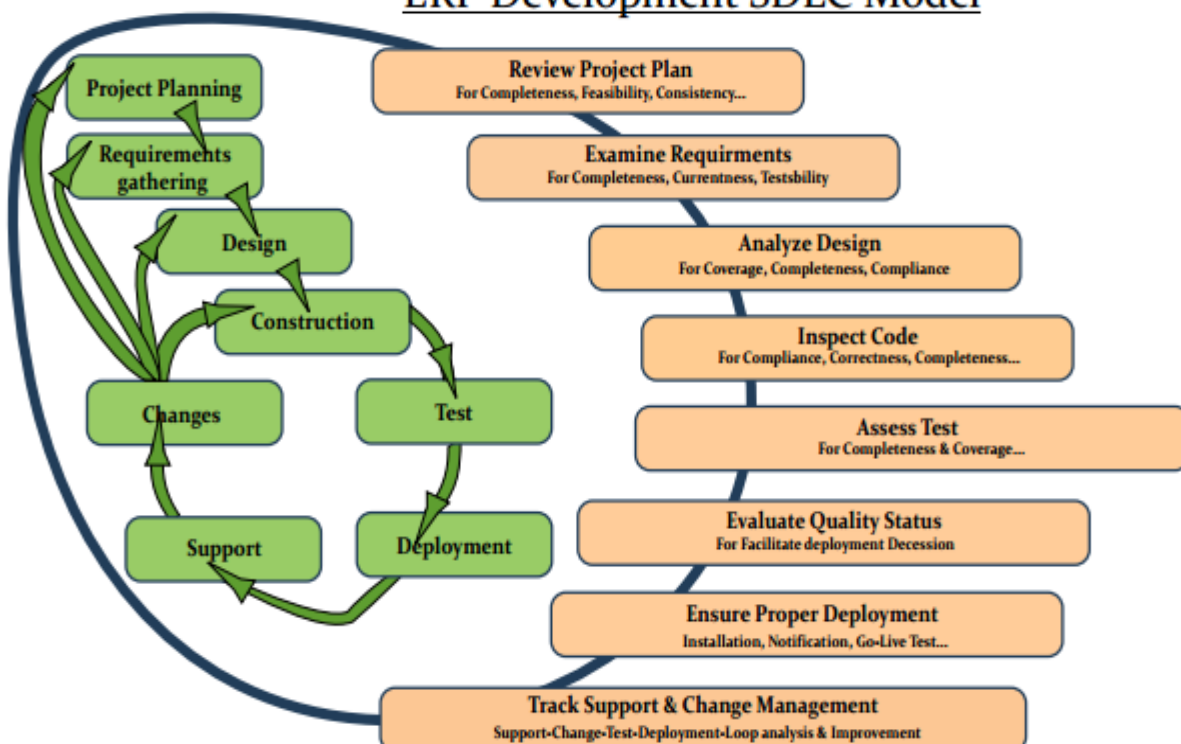

ERP Development Center Model

The basic advantage of the framework is that provides a clear understanding of the roles and activities between on site and Client Side teams. Though the development is carried out at our development center in India the company does not leave its focus on quality and customer satisfaction.

The On-site team keeps close interaction with the customer providing him a single point contact with the project team.

ERP Development SDLC Model

Technology with Ethics

Quality Assurance & Standards:

Signum ITechnology is committed to providing quality services to all its customers. The company has well defined processes in all the business areas. Especially for software development the company has developed an exhaustive list of documents that are required to be maintained during system development life cycle. Our quality management system has been designed to manage both on site and of shore services and meet the requirements of customers. Signum ITechnology also provides one of the best working environments for its software professionals. Its development center in Mumbai, India is well known for its excellent location and provides one of the most conducive environments for software development work. We have already developed comprehensive procedures and methodologies for development. We have also developed a comprehensive quality system, which ensures quality both during requirement analysis, development and implementation stages. Our dedicated quality professionals are responsible for implementation of quality procedures and standards. A comprehensive set of management reports also help in keeping a close watch on project execution.

Business Process + IT + Consulting:

Signum have a pool of specialized multi-disciplinary resource available to its Clients on a dedicated or as-needed basis. Signum organizes and manages the team, supervises the project life cycle and constantly trains and keeps the Team updated with the latest development concepts and technologies. What are your objectives? What is your strategy? We offer multiple engagement models to meet diverse needs of global clients. You can choose from any one the generally accepted outsourcing engagement models below or a combination of them for different phases of your project. We can also work with you to customize a model to address your specific need.

Signum iTechnology's Differentiators:

Since the Company has diversified businesses in both processes based and discrete manufacturing it has instant access to the experience of professionals from these domains and has knowledge of their managerial requirements. It can always relate to issues that help during finalization of Gap Analysis and ERP planning. Signum iTechnology's focus on Microsoft Technologies puts it in a unique position. Being dynamic and focused it has complete flexibility in its business processes and can easily adopt and restructure itself as per customer's specific requirement.
